

“

I am Charlotte Woodward, a National Down Syndrome Society Education Programs Associate. Health care, like treatment for Alzheimer's disease, has always been very important to me. My family hasn't been affected by Alzheimer's, but I know that having Down syndrome puts me at greater risk for it. I hope my participation in studies will help researchers find new treatments. Join me in the Trial-Ready Cohort-Down Syndrome and take part in this important research.

I'M READY TO MAKE HISTORY!
HOW ABOUT YOU?

TRCDS
Trial-Ready Cohort-Down Syndrome

The Trial-Ready Cohort – Down Syndrome (TRC-DS) is a community of potential clinical trial participants who could help find a cure for Alzheimer’s disease. TRC-DS is funded by the National Institutes of Health’s INCLUDE Project, in collaboration with [ACTC-DS](#) and [ABC-DS](#).

If you are a healthy person, ages 25 – 55, with Down syndrome, learn how you can make a difference.

TRC-DS is recruiting participants at research centers across the United States and several countries in Europe.

Visit www.TRCDS.org to connect with a research center near you.
