

Help us fight Alzheimer's disease!

ABATE

- The **ABATE Study** is testing a **potential treatment** for **Alzheimer's disease**.
- We are asking **people with Down syndrome** to **join the study**.

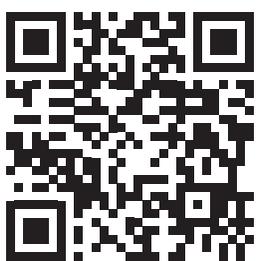

We have **two goals**:

- 1.** To **learn more** about the potential treatment's **safety**.
- 2.** To see if it can **slow down Alzheimer's disease** in **people with Down syndrome**.

You may be able to **join** if:

- ✓ You have **Down syndrome**.
- ✓ You are **35–50 years old**.
- ✓ You have a **close friend or family member** who can **come with you** to study visits.
